

CREO TO REVIT EXPORTER

Creo to Revit Exporter is a data exchange tool to export your Creo 3d model to Revit with all metadata and geometry maintained

FEATURES & BENEFITS

- Convert all your Creo parts and assemblies to native Revit families (rfa) and projects (rvt).
- Export based on your desired configuration and coordinate system to match your customer's Revit project coordinates
- Choose only the specific part and assembly properties you want to share and protect your proprietary information
- Obtain Non-triangulated Solid geometry
- Define the hierarchy structure in Revit
- Import the models in your custom Revit template and Assign individual Revit categories to your parts
- Advanced geometry simplification options
