CREO TO RHINO EXPORTER

Creo to Rhino Exporter is a data exchange tool to export your Creo 3d model to Rhino with all metadata and geometry maintained

FEATURES & BENEFITS

- Convert all your Creo parts and assemblies to native Rhino blocks and nested blocks.
- Export based on your desired simplified representation and coordinate system to obtain the required orientation inside Rhino
- Export models with parameter and material information and maintain the same in Rhino
- Obtain non-triangulated solid geometry
- Instantiate your parts and maintain the hierarchy inside Rhino
- Transfer all colours and properties as well
- Exclude materials and Ignore Hierarchy grouping while importing and map or customize the geometry type of the importing components
- Make use of various features to simplify your models with the user-friendly interface combined with easy operation to assist novice and experienced designers alike
