

REVIT TO CREO EXPORTER

Revit to Creo Exporter is a data exchange tool to export your Revit 3d model to Creo with all metadata and geometry maintained

FEATURES & BENEFITS

- Convert all your Revit Families/Projects to native Creo Parts and Assemblies.
- Export based on views from Revit and simplify the export based on the user's choice
- Export models with parameter and material information and maintain the same in Creo
- Obtain non-triangulated solid geometry
- Instantiate Revit system families and objects
- Transfer all parameters and materials as well
- Customize the export by Grouping the components based on Category & family Type from Revit and have the grouped elements under Sub-assemblies in Creo
- Simplify your models with the user-friendly interface combined with easy operation to assist novice and experienced designers alike
