

RHINO TO CIVIL 3D EXPORTER

Rhino to Revit Exporter is a data exchange tool which creates native Civil 3D Blocks (.dwg) from Rhino Blocks(.3dm).

FEATURES & BENEFITS

- Convert all your Rhino geometry like NURBS surfaces, meshes etc. to native Revit families (rfa) and projects (rvt)
- Export based on your desired layers, block name or group name and group the geometry based on Layer Hierarchy or Layer Name or Object type
- Export models based on Internal Origin or Named C plane from Rhino and Include or Exclude Locked components, Hidden components, Duplicated Components, Attachment and Orphan geometries
- Smoothen the edges and obtain non-triangulated solid geometry
- Instantiate the blocks and maintain the heirarchy inside Civil 3D
- Transfer all RGB colors and properties as well
- Import using various import types to maintain model hierarchy in Civil3D accordingly
- Make use of various features to simplify your models with the user-friendly interface combined with easy operation to assist novice and experienced designers alike
