

SKETCHUP TO CREO EXPORTER

Sketchup to Creo Exporter is a data exchange tool which creates Native Creo Parts and Assemblies from SketchUp Components.

FEATURES & BENEFITS

- Convert all your SketchUp Components to native Creo Parts(.prt) and assemblies(.asm).
- Export based on your desired layer or scene selection and group the geometry based on Layer name or Object type.
- Export models based on Component name selection or Group name selection
- Obtain non-triangulated solid geometry.
- Instantiate the blocks and maintain the hierarchy inside Creo.
- Include or Exclude Unnamed components, Unnamed Groups and Orphan geometries.
- Export models with parameter and material information (RGB colors) and maintain the same in Creo.
- Simplify your models with the user-friendly interface combined with easy operation to assist novice and experienced designers alike.
