

# SKETCHUP TO RHINO EXPORTER

Sketchup to Rhino Exporter is a data exchange tool which creates Native Rhino Blocks from SketchUp Components.

# FEATURES & BENEFITS

---

- Convert all your SketchUp Components to native Rhino Blocks or Nested Blocks (.3dm).
- Export based on your desired layer or scene selection and group the geometry based on Layer name or Object type.
- Export models based on Component name selection or Group name selection
- Obtain non-triangulated solid geometry.
- Instantiate the blocks and maintain the hierarchy inside Rhino.
- Include or Exclude Unnamed components, Unnamed Groups and Orphan geometries.
- Export models with parameter and material information (RGB colors) and maintain the same in Rhino.
- Simplify your models with the user-friendly interface combined with easy operation to assist novice and experienced designers alike.
